WTI
COMMUNICATIONS

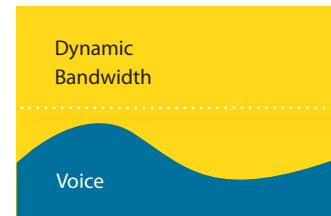

WTI Communications, Inc.

WTI Communications delivers high speed T1 Internet access, local and long distance phone service, email hosting and more — through one provider with one bill.

Dynamic T1

Delivering both voice and data over a high capacity T1, this dynamically allocated suite uses your idle phone channels to boost capacity of your data access when your phones are not in use. Bandwidth automatically adjusts based on the number of voice channels utilized at any given moment.

WTI ensures you have enough voice lines for your calling patterns. And when a line isn't in use, you'll benefit from increased bandwidth.

All of your
telecom needs
in one package
— voice and
internet access,
free local calling
and much more.
